

Question 1: How did this experience compare with your typical classroom experience?

- Finding real life connections
- LEARNING WAS STUDENT CENTERED
- Different levels of tech.
- Multiple solutions/methods accepted & teacher letting go

Jul 7-7:28 AM

Question 2: How do you think students would react to this type of learning experience?

- they would be more engaged and want to learn
- Some would have "growing pains" when learning to be more self-directed through the lesson
- May be afraid to ask for help (with technology)

Jul 7-7:29 AM

Question 3: What may need to be modified to be able to teach using such a method of instruction?

- Rewrite contracts (class expectations) new roles
- Teachers need to "let go" (be more willing to have student-centered lessons)
- Be willing to share resources
- Be flexible with your pacing
- Start small when integrating technology
